

## Declension of Entropy

installation, PCV, 2019/2024

The work is based on a linguistic game with mathematical notation. The word *entropia* [entropy], which in science is used to describe a measure of disorder, is here subordinated to the rigid rules of declension. If we assume that the arrow symbol, meaning “tending to” in formal notation, is interpreted as “tracking something” [*tropi* in Polish], subsequent lines of the work can be read in ways that represent the Polish declension of the word *entropia*:

*en tropi a* [n tracks a]

*en tropi i* [n tracks i]

*en tropi i* [n tracks i]

*en tropi e* [n tracks e]

*en tropi q* [n tracks q]

*en tropi i* [n tracks i]

*en tropi o!* [n tracks o!]
